

Red Pine Exploration Enters into MOU with Michipicoten First Nation

Toronto, Ontario – September 27, 2017 – Red Pine Exploration Inc. (TSX-V: RPX) (“Red Pine” or the “Company”) is pleased to announce that it has entered into a Memorandum of Understanding (“MOU”) with the Michipicoten First Nation. The MOU outlines a clear and mutually agreed upon process for consultation between the parties during the exploration phase of Red Pine’s program. Red Pine is carrying out exploration work on its Wawa Gold Project located near the Town of Wawa, approximately 220 km north of Sault Ste. Marie, in northeastern Ontario. The Wawa Gold Project consists of fee simple lands and mining claims that are located in the Michipicoten First Nation (“MFN”) Territory.

The MFN is a signatory of the 1850 Robinson-Superior Treaty and an aboriginal people within the meaning of Section 35 of the Constitution Act, 1982, and as such, asserts aboriginal and treaty rights within the area.

Quentin Yarie, President and Chief Executive Officer of Red Pine stated, *“The Company, and its predecessors, have always maintained a good working relationship with MFN. This MOU formalizes the consultation process regarding the development of the Wawa Gold Project, and enables MFN to understand the potential impacts of the development of the Project on the exercise of aboriginal and treaty rights.”*

We want to continue to foster a mutually beneficial working relationship, founded on principles of trust, respect and understanding as we continue to advance the Project. It has been a pleasure to work with the representatives of MFN on the MOU. MFN has been considerate and understanding through the whole process and Red Pine does not envision anything different as we move towards more intensive exploration and development considerations in the future.”

Wawa Gold Project

The Wawa Gold property package consists of over 5,000 hectares and hosts several former mines with a combined historic production of 120,000 ounces (“oz”) of gold¹ (“Au”). To date, the largest gold deposit on the property is the Surluga deposit, which hosts a NI 43-101 Inferred Resource of 1,088,000oz Au at an average grade of 1.71 g/t using a 0.5 g/t cut-off contained within 19.82 million tonnes².

Exploration work by Red Pine during the past 19 months has involved the sampling of 42,000 metres of historic core that was never sampled by previous operators of the project (initiated in February 2016) and aggressive drilling campaigns.

To date, the Company completed over 22,000 metres of drilling and made four discoveries along the extension of the Surluga Deposit: the Surluga North Zone; the Hornblende-William Zone; The Minto Mine South Zone; and the Grace-Darwin Zone. All these mineralized zones are interpreted to form a coherent structural system, the Wawa Gold Corridor, and are anticipated to have a positive impact on the property's gold inventory.

Red Pine's on-going 20,000-metre drill program is focussed on three of the four key discoveries with two drills operating non-stop on the property. The first drill is currently targeting the Surluga North discovery, where Red Pine's hole SD-16-45 intersected 14.66 g/t gold over 15.23 metres (the Surluga North high-grade zone) while the second drill is targeting the Minto Mine South Zone where the discovery of a near-surface high-grade quartz vein (Minto E discovery) (see Sept. 20, 2017 News Release) further emphasises the potential of the zone.

The Company is well-funded and as such, the sampling and drill programs will continue throughout 2017. A preliminary metallurgical study is underway to optimize gold and silver recoveries and an estimate of exploration potential is expected later this fall.

¹Mineral Resource Statement, Surluga-Jubilee Gold Deposit, Wawa Gold Project, Ontario, SRK Consulting (Canada) Inc. (effective May 26, 2015)). The report is available on www.SEDAR.com under Red Pine's profile.

²NI 43-101 inferred resource of 1,088,000 ounces of gold at a 1.71 grams per tonne (g/t) using a 0.40 g/t gold cut-off grade for pit-constrained and 2.50 g/t gold cut-off grade for underground-constrained resources, contained in 19.82 million tonnes open along strike and at depth. The Cut-off grades are based on a gold price of US\$1,250 per ounce and a gold recovery of 95 percent (Mineral Resource Statement, Surluga-Jubilee Gold Deposit, Wawa Gold Project, Ontario, SRK Consulting (Canada) Inc (effective May 26, 2015)).
